RESPONDER

personal alarm system

SBES Responder is the tracking and emergency device, which guarantees you protection at all times.

It is extremely easy to operate and can be programmed for your individual needs.

Simple, flexible setup

The SBES Responder can be programmed to:

- Determine which number it calls in an emergency
- How often and when to transmit location data
- Record all events and positions

Ease of operation

The SBES Responder only has the indicators and buttons necessary for use. This eliminates the chance of wrong alarms.

Alarm centre

24/7 alarm receiving centre rated B.S. 5759

Reliable and sensitive

Extremely good reception is one of the major advantages of SBES Responder.

Its antennas are adjusted and optimised for maximum sensitivity.

It works even under the most difficult conditions.

Advanced functionality

Some of the more advanced functions of SBES Responder:

- 2-way radio link i.e. for using safe tags (434 or 838 MHz)
- DTMF transceiver, for coding and encoding
- 3-axis G-sensor, (Movement sensor)
